This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Increased Mortality in Critically Ill Patients with Mild or Moderate Hyperbilirubinemia

Charalampos Pierrakos MD,<sup>1</sup> Dimitrios Velissaris MD,<sup>2</sup> Peter Felleiter MD PhD,<sup>3</sup> Massimo Antonelli MD,<sup>4</sup> Philippe Vanhems MD,<sup>5</sup> Yasser Sakr MD PhD,<sup>6</sup> Jean-Louis Vincent MD PhD<sup>7</sup>

on behalf of the EPIC II investigators

1 Intensive Care Department, Brugmann University Hospital, Brussels, Belgium.

2 Internal Medicine Department, University Hospital of Patras, Greece.

3 Intensive Care Medicine, Swiss Paraplegic Centre, Nottwil, Switzerland

4 Dept. of Anesthesiology and Intensive Care Medicine, Catholic University of Rome, A. Gemelli University Hospital, Rome

5 Hospices Civils de Lyon, Service d'Hygiène, Epidémiologie et Prévention, Unité

Epidémiologie et Biomarqueurs de l'Infection, Lyon, France

6 Dept. of Anesthesiology and Intensive Care, Uniklinikum Jena, Jena, Germany

7 Department of Intensive Care, Erasme Hospital, Université Libre de Bruxelles, Brussels, Belgium

**Running title:** Higher Mortality in Patients with High Bilirubin

**Conflicts of interest:** The authors have no conflicts of interest to declare

**Funding:** no external funding

**Corresponding author:**

Jean-Louis Vincent

Department of Intensive Care

Erasme Hospital
