This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Overlapping functions of bone sialoprotein and pyrophosphate regulators in directing cementogenesis

Words in abstract: 331

Total words: 6,577

References: 117

Figures: 6

Tables: 1

Supplemental Materials: 3 Appendix Tables and 4 Appendix Figures

Running title: Pyrophosphate and bone sialoprotein regulate cementum

MeSH key words: Extracellular Matrix, Tooth Calcification, Dental Cementum, Periodontium, Odontogenesis, Bone
