

## Accepted Manuscript

P2X7Rs are involved in cell death, growth and cellular signaling in primary human osteoblasts

Ankita Agrawal, Zanne Henriksen, Susanne Syberg, Solveig Petersen, Derya Aslan, Marie Solgaard, Nis Nissen, Tommy Korsgaard Larsen, Peter Schwarz, Thomas H. Steinberg, Niklas Rye Jørgensen

PII: S8756-3282(16)30344-1  
DOI: doi: [10.1016/j.bone.2016.11.011](https://doi.org/10.1016/j.bone.2016.11.011)  
Reference: BON 11183

To appear in: *Bone*

Received date: 8 August 2016  
Revised date: 10 November 2016  
Accepted date: 11 November 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
