Assessment of collagen quality associated with non-enzymatic cross-links in human bone using Fourier-transform infrared imaging

F.N. Schmidt, E.A. Zimmermann, G.M. Campbell, G.E. Sroga, K. Püschel, M. Amling, S.Y. Tang, D. Vashishth, B. Busse

PII: S8756-3282(17)30015-7
DOI: doi: [10.1016/j.bone.2017.01.015](https://doi.org/10.1016/j.bone.2017.01.015)
Reference: BON 11234

To appear in: *Bone*

Received date: 5 February 2016
Revised date: 3 January 2017
Accepted date: 17 January 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Assessment of collagen quality associated with non-enzymatic cross-links in human bone using Fourier-transform infrared imaging
