

## Accepted Manuscript

Title: DEVELOPMENTAL NEUROTOXICITY AND  
AUTISM: A POTENTIAL LINK BETWEEN INDOOR  
NEUROACTIVE POLLUTANTS AND THE CURIOUS  
BIRTH ORDER RISK FACTOR

Authors: Wesley A. Gray, Vincent A. Billock

PII: S0736-5748(17)30167-3  
DOI: <http://dx.doi.org/doi:10.1016/j.ijdevneu.2017.07.004>  
Reference: DN 2207

To appear in: *Int. J. Devl Neuroscience*

Received date: 29-5-2017  
Revised date: 24-7-2017  
Accepted date: 24-7-2017

Please cite this article as: Gray, Wesley A., Billock, Vincent A., DEVELOPMENTAL NEUROTOXICITY AND AUTISM: A POTENTIAL LINK BETWEEN INDOOR NEUROACTIVE POLLUTANTS AND THE CURIOUS BIRTH ORDER RISK FACTOR. *International Journal of Developmental Neuroscience* <http://dx.doi.org/10.1016/j.ijdevneu.2017.07.004>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

*Submitted (in revised form) as an Integrative Review Article for International Journal of  
Developmental Neuroscience*

Running Title: Indoor Pollutants and Birth Order Autism Risk

### Highlights

- Some environmental toxins modulate autism risk.
- First-borns are at greater risk for autism than later-borns.
- Some semi-volatiles in infant products have neurotoxic and endocrine effects.
- Reused volatile-depleted products may reduce risks for later-borns.
- Similar effects may modulate season-of-birth, affluence and gender risk factors.
- 

**Competing Interests Declaration:** The authors declare that they have no actual or potential competing interests. Over the last three years Vincent Billock has been supported by the *National Science Foundation*, by *AFRL*, and by *New Agendas for the Study of Time*.
