This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# **Different histories of two highly variable LTR retrotransposons in sunflower species**

Flavia Mascagni, Andrea Cavallini, Tommaso Giordani, Lucia Natali \*

Dept. of Agriculture, Food, and Environment, University of Pisa, Via del Borghetto 80, I-56124  
Pisa, Italy

*Abbreviations:* LTR, long terminal repeat; RE, retroelements; TE, transposable elements; RT, reverse transcriptase.
