

## Accepted Manuscript

WNT inhibitory factor 1 promoter hypermethylation is an early event during gallbladder cancer tumorigenesis that predicts poor survival

Bin Lin, HaiJie Hong, XiaoJie Jiang, ChengZong Li, SiYuan Zhu, NanHong Tang, XiaoQian Wang, FeiFei She, YanLing Chen

PII: S0378-1119(17)30285-8  
DOI: doi: [10.1016/j.gene.2017.04.034](https://doi.org/10.1016/j.gene.2017.04.034)  
Reference: GENE 41883

To appear in: *Gene*

Received date: 20 December 2016  
Revised date: 7 April 2017  
Accepted date: 19 April 2017

Please cite this article as: Bin Lin, HaiJie Hong, XiaoJie Jiang, ChengZong Li, SiYuan Zhu, NanHong Tang, XiaoQian Wang, FeiFei She, YanLing Chen , WNT inhibitory factor 1 promoter hypermethylation is an early event during gallbladder cancer tumorigenesis that predicts poor survival. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Gene(2017), doi: [10.1016/j.gene.2017.04.034](https://doi.org/10.1016/j.gene.2017.04.034)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
