Mass spectrometric detection combined with bioinformatic analysis identified possible protein markers and key pathways associated with bladder cancer

Ziyu Wu, Sugui Wang, Fujin Jiang, Qiang Li, Chao Wang, Huanqiang Wang, Wei Zhang, Peng Xue, Shoulin Wang

PII: S0378-1119(17)30411-0
DOI: doi: [10.1016/j.gene.2017.05.054](https://doi.org/10.1016/j.gene.2017.05.054)
Reference: GENE 41954

To appear in: *Gene*

Received date: 31 December 2016

Revised date: 9 May 2017

Accepted date: 24 May 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Mass spectrometric detection combined with bioinformatic analysis identified possible protein markers and key pathways associated with bladder cancer
