The association of eight potentially functional polymorphisms in five adrenergic receptor-encoding genes with myocardial infarction risk in Han Chinese

Kun Xia, Rongjing Ding, Zhiyong Zhang, Weiming Li, Xiaoming Shang, Xinchun Yang, Lefeng Wang, Qi Zhang

PII: S0378-1119(17)30305-0
DOI: doi: [10.1016/j.gene.2017.04.045](https://doi.org/10.1016/j.gene.2017.04.045)
Reference: GENE 41894

To appear in: *Gene*

Received date: 16 March 2017
Revised date: 20 April 2017
Accepted date: 25 April 2017

Please cite this article as: Kun Xia, Rongjing Ding, Zhiyong Zhang, Weiming Li, Xiaoming Shang, Xinchun Yang, Lefeng Wang, Qi Zhang , The association of eight potentially functional polymorphisms in five adrenergic receptor-encoding genes with myocardial infarction risk in Han Chinese. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. *Gene*(2017), doi: [10.1016/j.gene.2017.04.045](https://doi.org/10.1016/j.gene.2017.04.045)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The association of eight potentially functional polymorphisms in five adrenergic receptor-encoding genes with myocardial infarction risk in Han Chinese
