This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Identification of suitable reference genes for miRNA expression normalization in gastric cancer

Ana Carolina Anauate^{a*}, Mariana Ferreira Leal^{a,b,d*}, Fernanda Wisnieski^a, Leonardo Caires Santos^a, Carolina Oliveira Gigeck^{a,c}, Elizabeth Suchi Chen^a, Jaqueline Cruz Geraldis^a, Danielle Queiroz Calcagno^d, Paulo Pimentel Assumpção^d, Samia Demachki^d, Carlos Haruo Arasaki^c, Laércio Gomes Lourenço^c, Ricardo Artigiani^e, Rommel Rodríguez Burbano^{d,f,g}, Marília Arruda Cardoso Smith^a

Author contributions: MFL, RRB and MCS designed the study. COG, ESC, CHA, LGL and PPA were responsible for sample collection. SM and RA performed the pathological analysis. ACA, MFL, FW, LCS, COG, ESC, and DQC performed the experiments. ACA and MFL analyzed the data. ACA, MFL and MCS wrote the first draft of the manuscript. All authors reviewed the last version of the manuscript.

Conflict of interest: The authors declare that they have no conflict of interest.
