

## Accepted Manuscript

The Wilms tumor protein WT1 stimulates transcription of the gene encoding insulin-like growth factor binding protein 5 (IGFBP5)

Miriam Müller, Anja Bondke Persson, Katharina Krueger, Karin M. Kirschner, Holger Scholz

PII: S0378-1119(17)30217-2  
DOI: doi: [10.1016/j.gene.2017.03.037](https://doi.org/10.1016/j.gene.2017.03.037)  
Reference: GENE 41843

To appear in: *Gene*

Received date: 12 August 2016  
Revised date: 2 March 2017  
Accepted date: 25 March 2017

Please cite this article as: Miriam Müller, Anja Bondke Persson, Katharina Krueger, Karin M. Kirschner, Holger Scholz , The Wilms tumor protein WT1 stimulates transcription of the gene encoding insulin-like growth factor binding protein 5 (IGFBP5). The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. *Gene*(2016), doi: [10.1016/j.gene.2017.03.037](https://doi.org/10.1016/j.gene.2017.03.037)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
