

Accepted Manuscript

High levels of local inter- and intra-host genetic variation of West Nile virus and evidence of fine-scale evolutionary pressures

Dylan J. Ehrbar, Kiet A. Ngo, Scott R. Campbell, Laura D. Kramer, Alexander T. Ciota

PII: S1567-1348(17)30123-5
DOI: doi: [10.1016/j.meegid.2017.04.010](https://doi.org/10.1016/j.meegid.2017.04.010)
Reference: MEEGID 3120

To appear in: *Infection, Genetics and Evolution*

Received date: 21 December 2016
Revised date: 7 April 2017
Accepted date: 10 April 2017

The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Meegid(2017), doi: [10.1016/j.meegid.2017.04.010](https://doi.org/10.1016/j.meegid.2017.04.010)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

High levels of local inter- and intra-host genetic variation of West Nile virus and evidence of fine-scale evolutionary pressures
