Whole-genome characterization of Uruguayan strains of avian infectious bronchitis virus reveals extensive recombination between the two major South American lineages

Ana Marandino, Gonzalo Tomás, Yanina Panzera, Gonzalo Greif, Adriana Parodi-Talice, Martín Hernández, Claudia Techera, Diego Hernández, Ruben Pérez

PII: S1567-1348(17)30237-X
DOI: doi: [10.1016/j.meegid.2017.07.009](https://doi.org/10.1016/j.meegid.2017.07.009)
Reference: MEEGID 3202

To appear in: *Infection, Genetics and Evolution*

Received date: 16 May 2017
Revised date: 4 July 2017
Accepted date: 6 July 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Whole-genome characterization of Uruguayan strains of avian infectious
bronchitis virus reveals extensive recombination between the two major
South American lineages.**
