This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

TITLE: Role of IL28B genotype in the liver stiffness increase in untreated patients with chronic hepatitis C

Authors: Lucio Boglione*, Jessica Cusato*, Giuseppe Cariti, Giovanni Di Perri, Antonio D'Avolio

*both Authors contributed equally to this paper

Unit of Infectious Diseases, University of Turin, Department of Medical Sciences, Amedeo di Savoia Hospital, Turin, Italy

Words (abstract): 216

Words: (excluding references, tables, and figure legends): 1273

Number of Figures and Tables: 1 figure and 2 tables

Running title: liver stiffness increase and IL28B

Corresponding Author: Lucio Boglione, Tel. +39.011.4393979, Fax: +39.011.4393882; e-mail: lucio.boglione@unito.it.com; Amedeo di Savoia Hospital, C.so Svizzera 164, 10149 Turin (Italy)

List of Abbreviations: chronic hepatitis C (CHC); Hepatitis C virus (HCV); pegylated interferon alfa (PEG-IFN); ribavirin (RBV); direct-acting antiviral agents (DAAs); genotype 1 (GT1); genotype 4 (GT4); inter-quartile range (IQR); Odds Ratio [OR].

Keywords: HCV; IL28B; liver stiffness; fibrosis progression; fibroscan

Conflicts of interest: The authors disclose no conflicts.

Ethical Approval: approved by our local Ethic Committee

Funding: this study was not supported.
