The evolution of plasmid stability: Are infectious transmission and compensatory evolution competing evolutionary trajectories?

James P.J. Hall, Michael A. Brockhurst, Calvin Dytham, Ellie Harrison

PII: S0147-619X(17)30001-X
DOI: doi: [10.1016/j.plasmid.2017.04.003](https://doi.org/10.1016/j.plasmid.2017.04.003)
Reference: YPLAS 2339
To appear in: *Plasmid*
Received date: 2 January 2017
Revised date: 27 April 2017
Accepted date: 27 April 2017

Please cite this article as: James P.J. Hall, Michael A. Brockhurst, Calvin Dytham, Ellie Harrison , The evolution of plasmid stability: Are infectious transmission and compensatory evolution competing evolutionary trajectories?. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Yplas(2017), doi: [10.1016/j.plasmid.2017.04.003](https://doi.org/10.1016/j.plasmid.2017.04.003)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The evolution of plasmid stability: Are infectious transmission and compensatory evolution competing evolutionary trajectories?
