Mutational Analysis Employing a Phylogenetic Mass Tree Approach in a Study of the Evolution of the Influenza Virus

Elma H. Akand, Kevin.M. Downard

PII: S1055-7903(17)30120-3

DOI: <http://dx.doi.org/10.1016/j.ympev.2017.04.005>

Reference: YMPEV 5791

To appear in: *Molecular Phylogenetics and Evolution*

Received Date: 5 February 2017

Revised Date: 29 March 2017

Accepted Date: 5 April 2017

Please cite this article as: Akand, E.H., Downard, Kevin.M., Mutational Analysis Employing a Phylogenetic Mass Tree Approach in a Study of the Evolution of the Influenza Virus, *Molecular Phylogenetics and Evolution* (2017), doi: <http://dx.doi.org/10.1016/j.ympev.2017.04.005>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Mutational Analysis Employing a Phylogenetic Mass Tree Approach
in a Study of the Evolution of the Influenza Virus**

Elma H. Akand and Kevin. M. Downard*

Infectious Disease Responses Laboratory

University of New South Wales, Sydney, NSW, Australia

Running title: mutational analysis employing mass trees

Word Count: 5406

Keywords: phylogenetics, algorithm, tree, mutation, mass spectrometry
