Title: A Computational Comparison of the Multiple-breath Washout and Forced Oscillation Technique as Markers of Bronchoconstriction

Author: Brody H. Foy David Kay

PII: S1569-9048(16)30274-9
DOI: <http://dx.doi.org/doi:10.1016/j.resp.2017.02.016>
Reference: RESPNB 2780

To appear in: *Respiratory Physiology & Neurobiology*

Received date: 15-11-2016
Revised date: 23-2-2017
Accepted date: 24-2-2017

Please cite this article as: Brody H. Foy, David Kay, A Computational Comparison of the Multiple-breath Washout and Forced Oscillation Technique as Markers of Bronchoconstriction, *Respiratory Physiology & Neurobiology* (2017), <http://dx.doi.org/10.1016/j.resp.2017.02.016>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A Computational Comparison of the Multiple-breath
Washout and Forced Oscillation Technique as Markers
of Bronchoconstriction

Brody H. Foy*, David Kay
