This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Feasibility of Exercise Stress Echocardiography and Myocardial Response in
Patients with Repaired Congenital Heart Disease**

Babar S. Hasan, M.D.,* Fatima I. Lunze M.D., ScD, Ph.D.,* Najveen Alvi, M.B., B.S,
Keri M. Shafer, M.D., Jonathan Rhodes, M.D.

Running title: *Exercise Stress Echo in Congenital Heart Disease*

From the Department of Pediatrics and Child Health (BSH and NA), Aga Khan Medical University,
Pakistan

From the Departments of Cardiology (FIL, KMS and JR) Boston Children's Hospital and the
Department of Pediatrics, Harvard Medical School, Boston, MA, USA

* Both authors contributed equally to the manuscript
There are no relationships with industry to disclose

Word Count: 5641 without abstract and supplement
(manuscript body and main tables 1-4)
