This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

TITLE PAGE

Serum Adipocytokine Levels as Surrogate Markers for Disease Activity of Crohn's Disease

Short title: Serum adipocytokine levels in Crohn's disease
