This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title

Identifying Different Causes of Hyponatremia by Determining Fractional Excretion of Uric Acid

Authors

Louis J. Imbriano, M.D., Joseph Mattana, M.D., James Drakakis, D.O., John K. Maesaka, M.D.

Institution

Department of Medicine and Division of Nephrology and Hypertension

Winthrop-University Hospital

259 First Street

Mineola, N.Y., USA 11501

Email addresses: Louis J. Imbriano limbriano@winthrop.org

Joseph Mattana jmattana@winthrop.org

James Drakakis jdrakakis@winthrop.org

John K. Maesaka jmaesaka@winthrop.org

Corresponding Author: John K. Maesaka, M.D.

Winthrop-University Hospital

Division of Nephrology

200 Old Country Road, Suite 135

Mineola, N.Y., USA 11501

Telephone: 516-663-2169

Email: jmaesaka@winthrop.org

Keywords: hyponatremia, salt wasting, fractional excretion uric acid

Conflicts of Interest and Source of Funding: This study was supported by a grant from Otsuka Pharmaceutical, USA.
