This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Original article

**Identification of Pulmonary Hypertension Caused by Left Heart Disease
(World Health Organization Group 2) Based on Cardiac Chamber Volumes
Derived from Chest CT**

Running title: CT identification of PH due to left heart disease

Galit Aviram MD,¹ Zach Rozenbaum MD,² Tomer Ziv-Baran PhD,³ Shlomo Berliner MD, PhD,²
Yan Topilsky MD,⁴ Dominik Fleischmann MD,⁵ Yon K. Sung MD,^{6,7} Roham T. Zamanian
MD,^{6,7} Haiwei Henry Guo MD, PhD⁵

Departments of ¹Radiology, ²Internal Medicine "D" and "E", and ⁴Cardiology, Tel Aviv Medical Center, affiliated to the Sackler Faculty of Medicine, Tel Aviv University, Tel Aviv, Israel; ³Department of Epidemiology and Preventive Medicine, School of Public Health, Sackler Faculty of Medicine, Tel Aviv University, Tel Aviv, Israel; Departments of ⁵Radiology and ⁶Pulmonary and Critical Care Medicine, and ⁷Vera Moulton Wall Center for Pulmonary Vascular Disease, Stanford Health Care, Stanford University School of Medicine Stanford, CA, USA

Address for correspondence: Galit Aviram, MD, Department of Radiology, Tel Aviv Sourasky Medical Center, 6 Weitzman Street, Tel Aviv 6423906, Israel. E-mail: aviramgalit@hotmail.com

Keywords: computed tomography (CT), pulmonary hypertension, left heart disease.

Funding: none.

Conflict of interest: Dr. Galit Aviram's institution received a research grant from Philips Medical Systems. Dr. Zamanian is a consultant to Selten, Bayer and Actelion and has stock option rights with Selten Pharmaceutical. He has served as principal investigator for research
