This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Word count: 3415

LASER-ASSISTED REMOVAL OF EMBEDDED VENA CAVA FILTERS:

A 5-YEAR FIRST-IN-HUMAN STUDY

Running title: Laser-Assisted Removal of Embedded IVC Filters

The first author wrote the initial draft of the manuscript and revised subsequent drafts based upon input from all coauthors. All coauthors vouch for the accuracy, completeness, and analysis of the reported data, and agree to publish the manuscript.

Conflicts of Interest: LVH has served as a consultant for Cook, Inc. None of the other authors have any relevant disclosures.

The abstract from this study was presented at the 2016 Society of Interventional Radiology Annual Scientific Meeting on April 5, 2016, in Vancouver, BC, Canada.
