Point: Should only primary care physicians provide shared decision making services to discuss the risks/benefits of a low dose chest CT for lung cancer screening? Yes

John D. Goodson, MD, FACP

PII: S0012-3692(16)62601-6

DOI: [10.1016/j.chest.2016.11.057](https://doi.org/10.1016/j.chest.2016.11.057)

Reference: CHEST 878

To appear in: *CHEST*

Received Date: 30 November 2016

Accepted Date: 30 November 2016

Please cite this article as: Goodson JD, Point: Should only primary care physicians provide shared decision making services to discuss the risks/benefits of a low dose chest CT for lung cancer screening? Yes, *CHEST* (2017), doi: 10.1016/j.chest.2016.11.057.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Point: Should only primary care physicians provide shared decision making services to discuss the risks/benefits of a low dose chest CT for lung cancer screening? Yes
