Abstract 242 words

Intravenous magnesium sulfate for bronchiolitis: A randomized trial

Khalid Alansari^{1,2,3}, MD, FRCPC, FAAP(PEM), Rafah Sayyed¹, MD, Bruce L Davidson⁴, MD, MPH, Shahaza Al Jawala¹, MD, Mohamed Ghadier¹, MD

Running head: Iv magnesium for bronchiolitis: A randomized trial

¹Division of Pediatric Emergency Medicine, Department of Pediatrics, Hamad Medical Corporation, ²Weill Cornell Medical College, Doha, Qatar, and ³Division of Pediatric Emergency Medicine, Department of Pediatrics, Sidra Medical and Research Center and ⁴Pulmonary and Critical Care Medicine Division, University of Washington School of Medicine, Seattle, Washington

Correspondence to: Khalid Alansari, MD, Department of Pediatrics, Division of Pediatric Emergency Medicine, Hamad Medical Corporation, PEC Al Saad, Sidra Medical and Research Centre, P.O. Box- 3050, Doha, Qatar, Email: dkmaa@hotmail.com

Running title: Intravenous magnesium sulfate for bronchiolitis.

Key words: Bronchiolitis, Magnesium sulfate, Respiratory syncytial virus, Length of stay, Respiratory infections.

Funding source: This study was hospital-sponsored by Hamad Medical Corporation.

Conflict of interest: The authors have no conflict of interest or financial relationships to disclose. No form of payment was given to anyone to produce the manuscript.
