Low Lateral Thoracic Site for Cardiac Implantable Electronic Device Implantation:
A Viable Alternative in Patients with Limited Access Options After Infected Device
Extraction

Jackson J. Liang, DO, Robert D. Schaller, DO, FHRS, Danesh S. Modi, DO, Andres
Enriquez, MD, Gregory E. Supple, MD, FHRS, Joshua M. Cooper, MD, FHRS

PII: S1547-5271(17)30721-X

DOI: [10.1016/j.hrthm.2017.06.004](https://doi.org/10.1016/j.hrthm.2017.06.004)

Reference: HRTM 7191

To appear in: *Heart Rhythm*

Received Date: 29 April 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Low Lateral Thoracic Site for Cardiac Implantable Electronic Device Implantation:**
2 **A Viable Alternative in Patients with Limited Access Options After Infected Device**
3 **Extraction.**

4 Running title: Low lateral thoracic device implantation
