This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Clinical and Biophysical Evaluation of Variable Bipolar Configurations during  
Radiofrequency Ablation for the Treatment of Ventricular Arrhythmias

Short Title: Bipolar RF Ablation

Duy T. Nguyen MD<sup>1</sup>, Wendy S. Tzou MD<sup>1</sup>, Michael Brunnquell MD<sup>1</sup>, Matthew Zipse, MD<sup>1</sup>,  
Joseph L. Schuller, MD<sup>1</sup>, Lijun Zheng, MS<sup>1</sup>, Ryan A. Aleong MD<sup>1</sup>, and William H. Sauer MD<sup>1</sup>

From the <sup>1</sup>University of Colorado, Section of Cardiac Electrophysiology, Division of  
Cardiology, Aurora, Colorado

**Disclosures**

Drs. Sauer and Nguyen receive significant research grants from Biosense Webster and CardioNXT and educational grants from St Jude Medical, Boston Scientific, and Medtronic. Drs. Sauer and Nguyen have a provisional patent on partially insulated focused catheter ablation. Drs. Nguyen and Sauer have non-public equity interests/stock options in CardioNXT.
