This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Epicardial Substrate Ablation for Brugada syndrome

Koonlawee Nademanee, MD, FHRS*

Meleze Hocini, MD**

Michel Haïssaguerre, MD**

From: *Pacific Rim Electrophysiology Research Institute, Bangkok Thailand and Los Angeles,
CA, USA. **Hopital Cardiologique du Haut-Leveque, CHU Bordeaux, IHU LIRYC, Bordeaux France

Disclosure: Dr Nademanee receives research grants and royalties from Biosense Webster Inc
