A comparison of the pro-angiogenic potential of human induced pluripotent stem cell derived endothelial cells and induced endothelial cells in a murine model of peripheral arterial disease

Zoe E Clayton, Gloria SC Yuen, Sara Sadeghipour, Jack D Hywood, Jack WT Wong, Ngan F Huang, Martin KC Ng, John P Cooke, Sanjay Patel

PII: S0167-5273(17)30553-3
DOI: doi:[10.1016/j.ijcard.2017.01.125](https://doi.org/10.1016/j.ijcard.2017.01.125)
Reference: IJCA 24494

To appear in: *International Journal of Cardiology*

Received date: 11 July 2016
Revised date: 28 December 2016
Accepted date: 26 January 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A comparison of the pro-angiogenic potential of human induced pluripotent stem cell derived endothelial cells and induced endothelial cells in a murine model of peripheral arterial disease

Zoe E Clayton, MSc (Hons)^{†‡}, Gloria SC Yuen, MEng (Biomed)^{†‡}, Sara Sadeghipour, PhD[†], Jack D Hywood, MSc^{†‡}, Jack WT Wong, PhD[§], Ngan F Huang^{**}, PhD, Martin KC Ng, MBBS, PhD^{†††}, John P Cooke, MD, PhD[§], Sanjay Patel, MBBS, PhD^{†††}

Word count: 6059

Brief title: Human iPSC-ECs and iECs in hindlimb ischemia

Funding: This work was supported by a National Health and Medical Research Council (NHMRC) Early Career Fellowship (grant number GNT0633283) and a grant from the Sydney Medical School Foundation.

Disclosures: None
