Effect of visit-to-visit blood pressure variability on cardiovascular events in patients with coronary artery disease and well-controlled blood pressure

Sungha Park, MD, PhD, Ping Yan, PhD, César Cerezo, MD, PhD, Barrett W. Jeffers, PhD

PII: S1933-1711(16)30485-5

DOI: [10.1016/j.jash.2016.08.004](https://doi.org/10.1016/j.jash.2016.08.004)

Reference: JASH 952

To appear in: *Journal of the American Society of Hypertension*

Received Date: 11 April 2016

Revised Date: 8 July 2016

Accepted Date: 15 August 2016

Please cite this article as: Park S, Yan P, Cerezo C, Jeffers BW, Effect of visit-to-visit blood pressure variability on cardiovascular events in patients with coronary artery disease and well-controlled blood pressure, *Journal of the American Society of Hypertension* (2016), doi: 10.1016/j.jash.2016.08.004.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Effect of visit-to-visit blood pressure variability on cardiovascular events
in patients with coronary artery disease and well-controlled blood
pressure**
