This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Patient characteristics associated with greater blood pressure control in a randomized trial of home blood pressure telemonitoring and pharmacist management

Running title: Subgroups with greater BP intervention effect

Authors: Stephen E. Asche, MA, Patrick J. O'Connor, MD, MPH, Steven P. Dehmer, PhD, Beverly B. Green, MD, MPH, Anna R. Bergdall, MPH, Michael V. Maciosek, PhD, Rachel A. Nyboer, BA, Pamala A. Pawloski, PharmD, JoAnn M. Sperl-Hillen, MD, Nicole K. Trower, BA, Karen L. Margolis, MD, MPH
