Title: Increased Left Ventricular Diastolic Stiffness is Associated with Heart Failure Symptoms in Aortic Stenosis Patients with Preserved Ejection Fraction

Author: Daisuke Kamimura, Takeki Suzuki, Ervin R. Fox, Thomas N. Skelton, Michael D. Winniford, Michael E. Hall

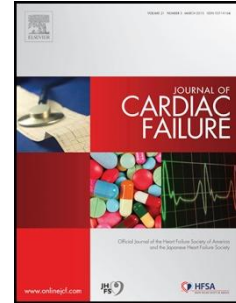

PII: S1071-9164(17)30113-6
DOI: <http://dx.doi.org/doi: 10.1016/j.cardfail.2017.05.002>
Reference: YJCAF 3956

To appear in: *Journal of Cardiac Failure*

Received date: 11-7-2016
Revised date: 16-4-2017
Accepted date: 5-5-2017

Hall, Increased Left Ventricular Diastolic Stiffness is Associated with Heart Failure Symptoms in Aortic Stenosis Patients with Preserved Ejection Fraction, *Journal of Cardiac Failure* (2017), <http://dx.doi.org/doi: 10.1016/j.cardfail.2017.05.002>.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title: Increased Left Ventricular Diastolic Stiffness is Associated with Heart Failure Symptoms in Aortic Stenosis Patients with Preserved Ejection Fraction

Daisuke Kamimura, MD, PhD; Takeki Suzuki, MD, MPH, PhD; Ervin R. Fox, MD, MPH; Thomas N. Skelton, MD; Michael D. Winniford, MD; Michael E. Hall, MD, MS

Department of Medicine, University of Mississippi Medical Center, Jackson, Mississippi

Short title: Diastolic Stiffness in Aortic Stenosis Patients

Grant support: Michael E. Hall is supported by 1K08DK099415 from the National Institutes of Health.
