Analysis of myocardial perfusion parameters in an *ex-vivo* porcine heart model using third generation dual-source CT

Gert Jan Pelgrim, Taylor M. Duguay, J. Marco A. Stijnen, Akos Varga-Szemes, Sjoerd Van Tuijl, U. Joseph Schoepf, Matthijs Oudkerk, Rozemarijn Vliegenthart

PII: S1934-5925(17)30025-4

DOI: [10.1016/j.jcct.2017.01.012](https://doi.org/10.1016/j.jcct.2017.01.012)

Reference: JCCT 960

To appear in: *Journal of Cardiovascular Computed Tomography*

Received Date: 29 September 2016

Accepted Date: 29 January 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Analysis of myocardial perfusion parameters in an ex-vivo porcine heart model using third generation dual-source CT

CT Perfusion analysis in an animal model

Competing financial interests:

Ing. Sjoerd van Tuijl and dr. Marco Stijnen are employees of LifeTec Group (Eindhoven, The Netherlands) which provided the Langendorff porcine heart setup (PhysioHeart®) as well as the porcine heart. These authors did not have influence on data analysis or result representation or interpretation. Prof. dr. U. Joseph Schoepf is a consultant for and/or receives research support from Astellas, Bayer, Bracco, GE, Guerbet, Medrad, and Siemens. Other authors have nothing to disclose.
