This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Efficacy and safety of the PCSK9 monoclonal antibody
alirocumab versus placebo in ~~1257~~ patients with
heterozygous familial hypercholesterolemia. ~~Analyses up
to 78 weeks from four ODYSSEY trials~~**
