This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Improved outcomes from extracorporeal membrane oxygenation versus ventricular assist device temporary support of primary graft dysfunction in heart transplant

Koji Takeda, MD, PhD*, Boyangzi Li, PhD*, Arthur R. Garan, MD†, Veli K. Topkara MD†, Jiho Han, BS*, Paolo C. Colombo, MD†, Maryjane A. Farr, MD†, Yoshifumi Naka, MD, PhD*, Hiroo Takayama, MD, PhD*

Total word count: 2549

Brief title: ECMO or VAD for PGD

Key words: primary graft dysfunction, heart transplantation, extracorporeal membrane oxygenation, ventricular assist device

*Department of Surgery, Division of Cardiothoracic Surgery

†Department of Medicine, Division of Cardiology
