This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title: Abnormal Pulmonary Endothelial Cells May Underlie The Enigmatic Pathogenesis of Chronic Thromboembolic Pulmonary Hypertension

Running Head: Pulmonary Endothelial Cells & CTEPH Pathogenesis

Authors: *Olaf Mercier, MD, PhD^{1,2}, *Jennifer Arthur Ataam, MSc¹, Nathaniel B. Langer, MD^{1,2}, Peter Dorfmueller, MD, PhD^{1,3}, Lilia Lamrani, MSc¹, Florence Lecerf¹, Benoit Decante, MSc¹, Philippe Darteville, MD^{1,2}, Saadia Eddahibi, PhD^{1,4}, Elie Fadel, MD, PhD^{1,2}
