This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Commentary on the manuscript from Megumi Mathison et al.  
Manuscript ID: JTCVS-16-534 accepted for publication under  
“Evolving Technology” category.**

**Title: Cellular reprogramming in cardiac diseases: A feather in the hat  
of regenerative medicine.**

**Devendra K. Agrawal\* and Chandra S. Boosani**

**Department of Clinical & Translational Science**

**Creighton University School of Medicine, Omaha, NE, USA**

**Funding for the work:** This work was supported by a research grants R01HL112597 and R01 HL128063 to DK Agrawal from the National Heart, Lung and Blood Institute, National Institutes of Health, USA. The content of this paper is solely the responsibility of the authors and does not necessarily represent the official views of the National Institutes of Health.

**Competing interests:** Both authors have read the journal's authorship agreement. The authors declare no conflict of interest.
