

Journal of Vascular Surgery

Peter Gloviczki and Peter F. Lawrence

Editors

INFORMATION FOR AUTHORS

SCOPE OF THE JOURNAL

The *Journal of Vascular Surgery*® is the premier international journal of medical, endovascular, and surgical care of vascular diseases. It is dedicated to the science and art of vascular surgery and aims to improve the management of patients with vascular diseases by publishing relevant papers that report important medical advances, test new hypotheses, and address current controversies. To achieve this goal, the *Journal* will publish original clinical and laboratory studies, and reports and papers that comment on the social, economic, ethical, legal, and political factors that relate to these aims. As the official publication of the Society for Vascular Surgery®, the *Journal* will publish, after careful peer review, selected papers presented at the annual meeting of that organization and affiliated vascular societies, as well as original articles from members and nonmembers.

EDITORIAL POLICIES

The editorial policies of the *Journal* are published in the January and July issues, on the Web site (www.jvascsurg.org), on the Editorial Manager Web site (<http://jvs.editorialmanager.com>), and are available from the Editorial Office on request.

ADMINISTRATIVE POLICIES

Ownership of manuscript. Manuscripts that are accepted for publication become the property of the *Journal of Vascular Surgery*®, which is copyrighted by the Society for Vascular Surgery®. They may not be published or reproduced in whole or in part without the written permission of the Publisher.

Permission to reproduce published material. Permission to reproduce material published in the *Journal of Vascular Surgery*® must be obtained from the Publisher at (215) 239-3804 or by email at healthpermissions@elsevier.com. Authors will be consulted, when possible, regarding reproduction or republication of their material.

Editors' and Publisher's waiver of responsibility. Statements and opinions expressed in articles and communications herein are those of the author(s) and not necessarily those of the Editors and Publisher. The Editors and Publisher disclaim any responsibility or liability for such material. Neither the Editors nor the Publisher guarantee, warrant, or endorse any product or service advertised in the *Journal*, and they do not warrant any claim made by the manufacturer of such product or service.

Institutional Review. Manuscripts that involve research conducted on human subjects must follow the principles outlined in the Declaration of Helsinki (<http://www.wma.net/e/policy/pdf/17c.pdf>) and include a statement in the Methods section that the experimental protocol and informed consent were approved by the Institutional Review Board and that all subjects gave informed consent. Manuscripts that report animal experiments must include a statement in the Methods section that the study was approved by the Institutional Review Board and that the animal care complied with the *Guide for the Care and Use of*

Laboratory Animals, Institute of Laboratory Animal Resources, Commission on Life Sciences, National Research Council. Washington: National Academy Press, 1996 (<http://stills.nap.edu/readingroom/books/labrats/>)

Clinical Trial Registration. In 2004, the International Committee of Medical Journal Editors (ICMJE) recommended that clinical trials be registered in a public database as a prerequisite for subsequent publication (De Angelis C, Drazen JM, Frizelle FA, et al. Clinical trial registration: a statement from the International Committee of Medical Journal Editors. *N Engl J Med* 2004;351:1250-1). Effective July 1, 2007 the *Journal of Vascular Surgery*® will adopt the policies recommended by the ICMJE and require the preregistration of all prospective clinical trials that have a control group (Cronenwett J, Seeger J. Requirement for Registration of Clinical Trials. *J Vasc Surg* 2007;45:1). In addition, the *Journal* will also require the preregistration of any commercially sponsored clinical trial, including Phase I and II trials. We do not anticipate registration of retrospective reviews or summaries of standard clinical treatment. Clinical trials that meet the above requirement and commence after July 1, 2007 must be registered prior to enrollment of the first patient. Relevant trials that began before this date must be registered prior to editorial review. Registration must be indicated by providing the unique study number assigned at www.clinicaltrials.gov, the principle site of registration sponsored by the National Library of Medicine (NLM). Detailed directions and a tutorial for registering a trial are available at <http://prinfo.clinicaltrials.gov>. Authors of unregistered trials or those with inadequate information in the registry will be given an opportunity to convince the Editors that their rationale for omitting this was critical, but it is expected that clinical trials involving prospective comparison of treatment or any that are commercially sponsored will all be registered after July 1, 2007.

SUBMISSION OF ORIGINAL MANUSCRIPT

The *Journal's* requirements for submission of a manuscript are in accordance with the Recommendations for the Conduct, Reporting, Editing, and Publication of Scholarly Work in Medical Journals of the International Committee of Medical Journal Editors (ICMJE) and are available at <http://www.icmje.org/icmje-recommendations.pdf>.

General requirements

Table of contents summary. During the submission process, authors of Clinical and Basic Science submission will be asked to summarize the manuscript in two sentences. Please keep the summary concise and limited to 400 characters. Please state the study design and the most important finding of the manuscript first, followed by a sentence that states the most important conclusion. If accepted for publication, this summary will appear on the table of contents under the title of your article.

Example: Intercoastal artery reimplantation did not significantly decrease spinal cord injury in this retrospective study of 805

patients with open repair of TAAs and TAAAs. The authors suggest physiologic interventions to reduce the rate of spinal cord ischemia.

Summary video. Clinical, Basic Science, and Review authors are encouraged to submit a 5-minute video summarizing the manuscript. If accepted for publication, this video will accompany the published article. For formatting instructions, see "Videos" page 20A.

Example: Oderich GS, Ribeiro M, Hofer J, Wigham J, Cha S, Chini J, et al. Prospective, nonrandomized study to evaluate endovascular repair of pararenal and thoracoabdominal aortic aneurysms using fenestrated-branched endografts based on supraceliac sealing zones. *J Vasc Surg*. 2016;65:124959.e10 [http://www.jvascsurg.org/article/S0741-5214\(16\)31286-1/fulltext](http://www.jvascsurg.org/article/S0741-5214(16)31286-1/fulltext).

Length. Clinical and basic research studies must include a structured abstract of 400 words or less. The body of the article must not exceed 3500 words. Tables must be limited to 10 or fewer. Figures must also be limited to 10 or fewer. Each figure and table must have a legend. Note that authors can include additional data (eg, details of methods, statistical analysis, tables, discussions) as appendices that will be published on the *Journal's* Web site but not in the print version. Please read our complete instructions for additional information: <http://www.editorialmanager.com/jvs/account/Information%20for%20authors.html>. Manuscripts that do not meet these guidelines will be sent back to the authors for editing before review.

Submission of manuscripts. Manuscripts must be submitted to the *Journal of Vascular Surgery*® electronically, using the Web-based system *Editorial Manager*. To submit a manuscript, authors should login to the Web site <http://jvs.editorialmanager.com>, where detailed instructions can be found. Manuscripts, including figures and tables, are submitted via this Web site in multiple files. To use this system authors must have an Internet connection, an email program, a Web browser, Microsoft Word, and Adobe Acrobat Reader (which can be downloaded at no charge at the above Web site).

Formatting instructions. Manuscripts must be created using Microsoft Word and uploaded in *Editorial Manager*.

- Double-space all sections (ie, abstract, text, acknowledgments, references, figure legends, and tables).
- Use 1-inch margins on all sides.
- Use 12-point Times New Roman font.
- Number the pages consecutively in the upper right corner.

Basic information for electronic submission

To upload a manuscript using *Editorial Manager*, authors must provide the following information:

- A concise, informative, declarative title;
- The preferred name(s), initials, and surname of the author(s) and their highest earned academic degrees, listed in the order that these should appear if the manuscript is published;
- Departmental and institutional affiliations of each author;
- A completed Application for Publication (<http://www.editorialmanager.com/jvs/account/info/Application%20for%20Publication%20Final.pdf>), including all financial or material support provided to the authors;
- The meeting, session (ie, plenary session, poster presentation, etc), date, and place where the paper was presented, if applicable;

- The name and address of the person to whom correspondence is to be addressed;
- The name and address of the author to whom requests for reprints should be addressed (if reprints will be available).

Forms to be transmitted with submitted manuscripts. All manuscripts must be accompanied by a completed Application for Publication (<http://www.editorialmanager.com/jvs/account/info/Application%20for%20Publication%20Final.pdf>). This information will be provided to reviewers and Editors. A conflict of interest statement will be published with each manuscript based on the information provided on this form. Authors are referred to a detailed publication on this topic (Johnston KW, Rutherford RB. Disclosure of conflict of interest. *J Vasc Surg* 1999;30:200-2). If an author fails to disclose his/her conflicts interests, the actions open to the Editors are described in Johnston KW, Rutherford RB. Failure to disclose competitive interests. *J Vasc Surg* 2000;31:1306. The *Journal* is a member of the Committee on Publication Ethics (COPE) and will follow its guidelines. More information about COPE may be found at <http://publicationethics.org/>.

On the Application for Publication, you must also report the unique study number assigned at www.clinicaltrials.gov if your study meets the requirements for registration (see the Clinical Trial Registration section.) In addition, the authors must make a meaningful disclosure regarding their discussions of off label or unapproved drugs or devices.

Finally, all revised manuscripts must be accompanied by a Review Response form. This form is available for download from the *Editorial Manager* Welcome page (<http://jvs.editorialmanager.com>).

Material to be submitted after manuscript acceptance

The Copyright Transfer form will be collected by the Publisher. After a manuscript is accepted, the Publisher will contact the corresponding author and send out a form to sign.

For further assistance and clarification, please contact:

Jessica McEwan - Managing Editor
jmcewan@vascularsociety.org
Phone: 603-523-2222

Consent to reproduce data. It is the authors' responsibility to obtain written consent from the copyright owner to reproduce direct quotations, tables, or illustrations that have appeared in copyrighted material and to provide complete information regarding their source. Similarly, permission must be obtained for tables and figures that have been modified from other publications. Such permissions must be obtained prior to manuscript submission and be provided to the Publisher when the Copyright Transfer form is collected. You can obtain permission to reproduce most content from the Copyright Clearance Center at www.copyright.com

Patient consent for publication. Photographs of identifiable persons must be accompanied by signed releases from patients or from both living parents or guardians of minors. As per AMA Style, inserting black bars over the patient's eyes is insufficient and may not be used. Patient consent must also be obtained from each case report and vascular image patient. Consent forms are available online at www.editorialmanager.com/jvs.

Description of manuscript components

Title. Titles must be concise and accurately reflect the content of the manuscript. *Furthermore, titles must be declarative,*
