Title: Amyloid-Beta Deposition is Associated with Increased Medial Temporal Lobe Activation during Memory Encoding in the Cognitively Normal Elderly

Author: Kathryn Edelman, Dana Tudorascu, Christian Agudelo, Beth Snitz, Helmet Karim, Ann Cohen, Chester Mathis, Julie Price, Lisa Weissfeld, William Klunk, Howard Aizenstein

PII: S1064-7481(16)30352-9
DOI: <http://dx.doi.org/doi: 10.1016/j.jagp.2016.12.021>
Reference: AMGP 758

To appear in: *The American Journal of Geriatric Psychiatry*

Received date: 18-4-2016
Revised date: 6-10-2016
Accepted date: 27-12-2016

Conflicts of Interest Disclosure:

GE Healthcare holds a license agreement with the University of Pittsburgh based on the technology described in this manuscript. Drs. Klunk and Mathis are co-inventors of PiB and, as such, have a financial interest in this license agreement. GE Healthcare provided no grant support for this study and had no role in the design or interpretation of results or preparation of this manuscript. All other authors have no conflicts of interest with this work and had full access to all of the data in the study and take responsibility for the integrity of the data and the accuracy of the data analysis.

Acknowledgements:

Grant support included: P50 AG005133, R37 AG025516, P01 AG025204, 5K23AG038479, and R01 MH076079 from the National Institutes of Health. Biomarker model of AD progression contributed by Christian Agudelo.
