Acknowledgements

The study was funded by the Dementia Collaborative Research Centre – Assessment and Better Care, University of New South Wales as part of an Australian Government Initiative. Additional funding was provided by Queensland University of Technology to support data collection in Brisbane. The sponsors had no role in the study design and reporting of the results.

The authors express appreciation to the aged care providers for their participation, registered nurses Eesa Witt and Judy McCrow for data collection, psychologists Kim Burns and Leander Mitchell for conducting the clinical assessments for our participants, and Professor Eneida Moish of the University of East Anglia for her feedback on Rasch analysis.
