This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

TITLE: Delayed CSF Rhinorrhea after Gamma Knife Radiosurgery with or without Preceding Transsphenoidal Resection for Pituitary Pathology

AUTHORS: Avital Perry MD¹, Christopher S Graffeo MD¹, William R Copeland III MD¹, Kathryn M Van Abel², Matthew L Carlson MD², Bruce E Pollock MD^{1,3}, Michael J Link MD^{1,2}

ORIGINATING INSTITUTION: Department of Neurologic Surgery¹, Department of Otolaryngology-Head and Neck Surgery² and Department of Radiation Oncology³, Mayo Clinic, Rochester MN

CORRESPONDING AUTHOR: Michael J. Link, MD
Department of Neurologic Surgery – Mayo Clinic
200 First St SW
Rochester, MN, USA 55905

Telephone: 507-284-4871
Fax: 507-284-5206
Email: Link.Michael@Mayo.edu

FINANCIAL MATERIAL & SUPPORT: None

CONFLICT(S) OF INTEREST TO DECLARE: None

KEYWORDS: Cerebrospinal fluid leak, gamma knife, transsphenoidal surgery, acromegaly, late outcomes

RUNNING HEADER: Delayed CSF Rhinorrhea

PREVIOUS PRESENTATION: Components of this research were presented at the North American Skull Base Society 2016 annual meeting

WORD COUNT: 2,693
