Cerebrospinal fluid volume does not have etiological role in the incidence of positional skull deformities

Guillaume Captier, MD, PhD, Adrien Galeron, MSc, Gérard Subsol, PhD, Melissa Solinhac, MSc, Thomas Roujeau, MD, Nicolas Leboucq, MD, Christian Herlin, MD, PhD

PII: S1010-5182(17)30204-4

DOI: [10.1016/j.jcms.2017.06.005](https://doi.org/10.1016/j.jcms.2017.06.005)

Reference: YJCMS 2701

To appear in: *Journal of Cranio-Maxillo-Facial Surgery*

Received Date: 19 December 2016

Revised Date: 21 May 2017

Accepted Date: 6 June 2017

Please cite this article as: Captier G, Galeron A, Subsol G, Solinhac M, Roujeau T, Leboucq N, Herlin C, Cerebrospinal fluid volume does not have etiological role in the incidence of positional skull deformities, *Journal of Cranio-Maxillofacial Surgery* (2017), doi: 10.1016/j.jcms.2017.06.005.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Cerebrospinal fluid volume does not have etiological role in the incidence of positional skull deformities.

Short running title: Cerebrospinal fluid volume and positional skull deformities
