This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Cement-retained and screw-retained implant-supported restorations showed comparable marginal bone loss and implant survival rate.**

**Article Title and Bibliographic Information**

Evaluation of cement-retained versus screw-retained implant-supported restorations for marginal bone loss: A systematic review and meta-analysis. Lemos CAA, de Souza Batista VE, de Faria Almeida DA, Júnior JFS, Verri FR, Pellizzer EP. *J Prosthet Dent* 2016;115(4):419-27

**Purpose/Question**

Does a cement-retained implant prosthesis have a different marginal bone loss and survival rate when compared to a screw-retained prosthesis?

**Type of Study/Design**

Systematic review with meta-analysis of data

**Reviewer's Name and Contact Information**

- Ahmed Yaseen Alqutaibi (corresponding author)

Lecturer, Department of Prosthodontics, Faculty of Oral and Dental Medicine, Ahrum Canadian University.Cairo, Egypt; Lecturer, Department of Prosthodontics, Faculty of Oral and Dental Medicine, IBB University, IBB, Yemen.
