Comment [JM1]: Would it be better to use people instead of patients? It is a bit more generic.

Comment [JM2]: Authors: affiliations are usually in alphabetical order, so these three would be a,b,c and so on. Please check your affiliation letters and amend and re-order your affiliations to match. Please also check all of your affiliations addresses, as this journal requires department, institution, city and country to be listed for each affiliation. Thanks.
