This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

26
27 **Conflict of interest:** M.E.R. has received payment from Immune Pharmaceuticals, Merck and
28 Receptos and has an equity interest in PulmOne, NKT Therapeutics, Immune Pharmaceuticals
29 and royalties from reslizumab (Teva Pharmaceuticals). M.E.R. is an inventor of several patents,
30 owned by Cincinnati Children's, and a set of these patents relates to molecular diagnostics of
31 eosinophilic esophagitis. All of the other authors have no potential conflicts to disclose.

32
33 **Funding support:** This work was supported by National Institutes of Health R37 AI045898,
34 R01 AI124355, U19 AI070235, U19 AI066738 (CoFAR supported by the National Institute of
35 Allergy and Infectious Diseases and National Institute of Diabetes and Digestive and Kidney
36 Diseases), and P30 DK078392 (Gene and Protein Expression Core); the Campaign Urging
37 Research for Eosinophilic Disease (CURED); the Buckeye Foundation; and the Sunshine
38 Charitable Foundation and its supporters, Denise A. Bunning and David G. Bunning.

39
40
41 **Running title:** Loss of esophageal identity in eosinophilic esophagitis
