**609**

Understanding the cost of dermatologic care: A survey study of dermatology providers, residents, and patients

**Bottom line:** Increased awareness of the cost of dermatologic care might improve patient outcomes and reduce overall health care expenditures.

Aaron J. Steen, MD, Julianne A. Mann, MD, Valerie M. Carlberg, MD, Alexa B. Kimball, MD, MPH, Michael J. Musty, MS, and Eric L. Simpson, MD, MCR

*Continued on page A10*

- 618** A predictive model for diagnosis of lower extremity cellulitis: A cross-sectional study  
**Bottom line:** This model might facilitate early identification of patients at risk for cellulitis misdiagnosis and improve patient care while decreasing cost.  
 Adam B. Raff, MD, PhD, Qing Yu Weng, MD, Jeffrey M. Cohen, MD, Nicole Gunasekera, BS, Jean-Phillip Okhovat, MD, MPH, Priyanka Vedak, MD, Cara Joyce, PhD, Daniela Kroshinsky, MD, MPH, and Arash Mostaghimi, MD, MPA, MPH
- 626** Clinical characteristics associated with days to discharge among patients admitted with a primary diagnosis of lower limb cellulitis  
**Bottom line:** Identification of risk factors for prolonged hospitalization may impact risk stratification and management recommendations.  
 Amit Garg, MD, Jonathan Lavian, BA, Gloria Lin, MS, Cristina Sison, PhD, Michael Oppenheim, MD, and Bonnie Koo, MD
- 632** Malignancy rates in a large cohort of patients with systemically treated psoriasis in a managed care population  
**Bottom line:** Increased skin cancer surveillance in this population may be warranted.  
 Maryam M. Asgari, MD, MPH, G. Thomas Ray, MBA, Jamie L. Geier, PhD, and Charles P. Quesenberry, PhD
- 639** The risk of melanoma and hematologic cancers in patients with psoriasis  
**Bottom line:** Patients with psoriasis and malignancy do not experience worse survival than patients without psoriasis.  
 Shivani P. Reddy, BS, Kathryn Martires, MD, and Jashin J. Wu, MD
- 648** Lesions on the back of hands and female gender predispose to stigmatization in patients with psoriasis  
**Bottom line:** Psoriatic lesions on the back of hands should be considered along with patients' Psoriasis Area and Severity Index scores when choosing their treatment and evaluating their therapy response.  
 Marlena Hawro, MA, Marcus Maurer, MD, Karsten Weller, MD, Romuald Maleszka, MD, PhD, Anna Zalewska-Janowska, MD, PhD, Andrzej Kaszuba, MD, PhD, Zofia Gerlicz-Kowalczyk, MD, PhD, and Tomasz Hawro, MD, PhD
- 655** Secukinumab sustains early patient-reported outcome benefits through 1 year: Results from 2 phase III randomized placebo-controlled clinical trials comparing secukinumab with etanercept  
**Bottom line:** For treating moderate to severe psoriasis, secukinumab offers sustained QOL benefits.  
 Bruce Strober, MD, PhD, Alice B. Gottlieb, MD, PhD, Bintu Sherif, MS, Patrick Mollon, MD, MBA, MSc, Isabelle Gilloteau, MSc, Lori McLeod, PhD, Todd Fox, PharmD, Margaret Mordin, MS, Ari Gnanasakthy, MSc, MBA, Charis Papavassilis, MD, PhD, and Mark G. Lebwohl, MD
