GLI2 is a regulator of β -catenin and is associated with loss of E-cadherin, cell invasiveness and long-term epidermal regeneration

Eleni Pantazi, Emiliios Gemenetzidis, Muy-Teck Teh, Sreekanth Vootukuri Reddy, Gary Warnes, Chris Evagora, Giuseppe Trigiante, Michael P. Philpott

PII: S0022-202X(17)31218-6

DOI: [10.1016/j.jid.2016.11.046](https://doi.org/10.1016/j.jid.2016.11.046)

Reference: JID 793

To appear in: *The Journal of Investigative Dermatology*

Received Date: 4 October 2015

Revised Date: 31 October 2016

Accepted Date: 26 November 2016

Please cite this article as: Pantazi E, Gemenetzidis E, Teh M-T, Reddy SV, Warnes G, Evagora C, Trigiante G, Philpott MP, GLI2 is a regulator of β -catenin and is associated with loss of E-cadherin, cell invasiveness and long-term epidermal regeneration, *The Journal of Investigative Dermatology* (2017), doi: 10.1016/j.jid.2016.11.046.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

GLI2 is a regulator of β -catenin and is associated with loss of E-cadherin, cell invasiveness and long-term epidermal regeneration

Eleni Pantazi¹, Emilios Gemenetzidis¹, Muy-Teck Teh², Sreekanth Vootukuri Reddy¹, Gary Warnes³, Chris Evagora⁴, Giuseppe Trigiane¹ and Michael P. Philpott¹⁺.
