PFKFB3, a direct target of p63, is required for proliferation and inhibits differentiation in epidermal keratinocytes

Robert B. Hamanaka, Gökhan M. Mutlu

PII: S0022-202X(17)30017-9

DOI: [10.1016/j.jid.2016.12.020](https://doi.org/10.1016/j.jid.2016.12.020)

Reference: JID 691

To appear in: *The Journal of Investigative Dermatology*

Received Date: 11 August 2016

Revised Date: 28 November 2016

Accepted Date: 19 December 2016

Please cite this article as: Hamanaka RB, Mutlu GM, PFKFB3, a direct target of p63, is required for proliferation and inhibits differentiation in epidermal keratinocytes, *The Journal of Investigative Dermatology* (2017), doi: 10.1016/j.jid.2016.12.020.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**PFKFB3, a direct target of p63, is required for proliferation and inhibits differentiation in epidermal keratinocytes**
