This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title: Factors that Increase Risk of Celiac Disease Autoimmunity Following a Gastrointestinal Infection in Early Life

Short title: Infections and celiac disease in early life

Kaisa M. Kempainen¹, Kristian F. Lynch², Edwin Liu³, Maria Lönnrot⁴, Ville Simell⁵, Thomas Briese⁶, Sibylle Koletzko⁷, William Hagopian⁸, Marian Rewers³, Jin-Xiong She⁹, Olli Simell¹⁰, Jorma Toppari^{11,12}, Anette-G. Ziegler¹³, Beena Akolkar¹⁴, Jeffrey P. Krischer², Åke Lernmark¹⁵, Heikki Hyöty^{4,16}, Eric W. Triplett¹, Daniel Agardh^{15*}, on behalf of the TEDDY Study Group*. *See TEDDY Study Group Appendix.
