Adenocarcinoma arising from an end ileostomy in a patient with familial adenomatous polyposis (FAP)

Justin T. Huntington, MD, MS, Peter P. Stanich, MD, Alan E. Harzman, MD

PII: S1542-3565(16)31120-X  
DOI: [10.1016/j.cgh.2016.11.022](https://doi.org/10.1016/j.cgh.2016.11.022)  
Reference: YJCGH 55008

To appear in: *Clinical Gastroenterology and Hepatology*  
Accepted Date: 18 November 2016

Please cite this article as: Huntington JT, Stanich PP, Harzman AE, Adenocarcinoma arising from an end ileostomy in a patient with familial adenomatous polyposis (FAP), *Clinical Gastroenterology and Hepatology* (2016), doi: 10.1016/j.cgh.2016.11.022.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Adenocarcinoma arising from an end ileostomy in a patient with familial adenomatous polyposis (FAP)**
