This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title: An Immunoassay to Rapidly Measure Acetaminophen Protein Adducts Accurately Identifies Patients with Acute Liver Injury or Failure

AcetaSTAT in Acute Liver Injury

Dean W. Roberts¹⁻³, William M. Lee⁴, Jack A. Hinson¹⁻², Shasha Bai^{1,3}, Christopher J. Swearingen^{1,3}, R. Todd Stravitz⁵, Adrian Reuben⁶, Lynda Letzig^{1,3}, Pippa M. Simpson⁷, Jody Rule⁴, Robert J. Fontana⁸, Daniel Ganger⁹, K. Rajender Reddy¹⁰, Iris Liou¹¹, Oren Fix¹² and Laura P. James¹⁻³

Financial support: This study was funded by NIDDK/STTR 2R42DK079387 to ATD and NIDDK U-01 DK58369 to ALFSG. We acknowledge the coordinators, patients and their families who participated at the study sites. Coordinators included Lee Howard (UAMS); Corron Sanders, Sycil Mathew and Angela Bowling (UTSW); Stephanie Taylor and Susan Walker (VCU); Wanda Jones and Melanie Crolley (MUSC); Jeanne Gottstein and Stephanie Barath (Northwestern); Emily Panik (UPenn); Susan Strom (UW); Stephanie Galang (UCSF).

Abbreviations:

ALT, alanine aminotransferase

3-cys-A or adduct, 3-(cysteine-S-yl) acetaminophen protein-adduct

HPLC-EC, high-pressure liquid chromatography with electrochemical detection

INR, international normalized ratio for prothrombin time
